AFTER

Need to obtain statistical data and enhanced digital visuals of your Fuji Prescale®/Pressurex® films?

Let our technicians analyze your pressure exposed impressions with the all new Topag® Pressure Analysis System.

Topag[®] enables a wealth of statistical information and high resolution detail to be extracted from your impression, greatly enhancing the value of the raw film alone. Now you can determine with a high degree of accuracy, total force, average pressure and total square inches of contact over your image area.

Additionally, Topaq[®] renders histogramic and population statistics on user-defined regions of interest. Submitting your pressure-exposed films to us is simple and inexpensive.

Pressure		
Average	1,824.19	PSI
Std. Dev	309.32	PSI
Area	8.97	sq.in
Force	16,358.13	lbf
Minimum	1,334.96	PSI
Maximum	5,372.04	PSI
Format :	#.##

Benefits

- Allows you to obtain high resolution precise pressure maps that are visually powerful
- Obtain detailed statistical data that is otherwise unobtainable with just the naked eye or color correlation chart
- Integrate force and total contact area data that is only available with a Topaq® image analysis

Service Pricing

Number of Images	Price per Analysis
1	\$90
2	\$75
3	\$65
4	\$55
5+	\$50

Prices based on 2 to 3 day turnaround Overnight delivery is subject to a 15% surcharge

Q

Please be sure to include the following data with your film impressions:

- 1. Which film type used?
- 2. Approximate exposure time?
- 3. Approximate temperature?
- 4. Approximate relative humidity?
