Pasture GEL Mat™

Linking scientific technology with cow comfort

Pasture GEL Mat™ provides several advantages similar to deep bedded sand stalls, without the associated challenges. Test results using digital pressure point body mapping reveal that the Pasture GEL Mat™ forms to the cow, relieving all pressure points while virtually eliminating hock sores.

Our extensive 'in barn' studies have proven the Pasture GEL Mat's™ effectiveness with cows lying down longer, shifting or moving less and therefore cows are more productive. Thanks to our patented formula, the Pasture GEL Mat™ system will not compact or harden therefore increasing its life span and ensuring an excellent return on your investment.

- Self-adjusting surface for ultimate comfort
- Firm surface that gently adjusts to cows pressure when standing or lying
- Will not compact or get hard over time
- Movement of the surface breaks up manure for easy cleaning
- Helps lame cows rise and stand comfortably

Top Cover

- Waterproof
- Non slip

Pasture GEL Mat™

- Self-adjusting
- Will not compact over time

Protective Underlay

What satisfied Dairymen say:

“My cows lay down longer and are much more comfortable”

“My Veterinarian commented on less hock sores. He figures it to be due to less shifting around while resting”

The World Leader In Animal Comfort

Pasture GEL Mat™ benefits:

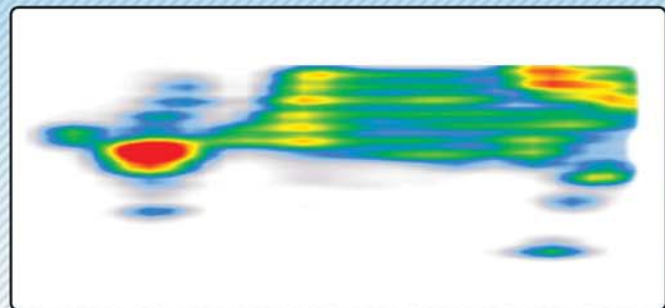

- Soft - will not lose its softness
- Consistent smooth animal surface
- Easier to clean
- Allows for cow to sink in much like sand
- The only mattress to perform like sand
- Stable Footing
- Comfortable
- Soft enough for even the lame cow
- Light weight for shipping
- Each Pasture GEL Mat™ contains gel powder prior to shipping
- Water added on site

Pasture GEL Mat™ Technical Data:

The Pasture GEL Mat™ is designed to imitate pasture creating a natural environment

Scientific real-time digital pressure point body mapping technology used in designing the Pasture GEL Mat™

What satisfied Dairymen say:

“ While helping with the testing of these mats, I noticed that the Pasture GEL Mat™ stalls were always more occupied ”

“ When cleaning the stalls, I now have to make the cow get up, and as soon as the stall is clean, she immediately goes and lies down ”

Over 20 Years of Animal Comfort

The dairy cow's needs must be met first and foremost. Fulfilling the need to design a resting area that emulates the characteristics of pasture by building a modern day free-stall barn is Promat's philosophy.

Over 20 years ago, Promat Inc. developed & patented the first cellular crumb rubber mattress for cows. This product has become a world leader in cow comfort stall flooring. Over 3 million units have been sold to date – this exceeds worldwide sales of all similar systems combined.

Promat Inc.'s engineer and research team is consistently improving our item range to produce more efficient animal comfort products.

Promat Inc.'s Range of Cow Comfort products

Pasture Mat®

The original mattress invented in 1991. Studied more than ANY other mattress system in the world, with almost 3,000,000 cows in over 40 countries.

Pack Mat™

Installed on an earth base and reduces sand usage by 50% to 80% while maintaining consistent stall dimensions.

Poly Pillow™

Indexes cow to help keep stalls clean and position the cow to reduce injuries when rising.

Premium Pad™

Additional high density foam layer to keep the cover smoother and easier to clean. Cows feet dig in for great traction while rising.
